PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed technical sales cycles for **EV charging systems**, engaging with specifiers, contractors, and end-users to identify and close large commercial opportunities.
- Developed and delivered tailored technical solutions for **large industrial and commercial EV charging installations**, ensuring alignment with client requirements and project scope.
- Collaborated with engineering and product teams to gather technical specifications and customer feedback, translating complex system capabilities into clear value propositions for potential clients.
- Provided post-sales technical support and consultation to end-users, ensuring successful integration and optimal performance of installed **EV charging infrastructure** and related systems.
- Built and maintained relationships with key stakeholders across the green energy sector, including representatives from leading global manufacturers of **EV charging technology**.
- Conducted technical presentations and product demonstrations for prospective clients, highlighting system benefits and addressing technical queries to facilitate sales closure.
- Containerized core application services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and enabling efficient scaling of backend operations.

SKILLS

Sales – Sales Engineering, Technical Sales, Account Management, Solution Selling, Business Development

EV Charging – EV Charging Systems, Commercial EV Charging, Fleet Charging, Transport Infrastructure Technology, Electrification

Technical Skills – REST APIs, Java Spring Boot, Python Scripting, SQL, PostgreSQL, AWS (EC2/S3/Lambda/CloudWatch), Docker

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Visualisation

Methodologies – Agile Scrum, CI/CD, Git, Jenkins, Jira, Confluence

Domain – Green Energy, Renewable Energy, Transport Infrastructure

PROJECTS

Technical Solutions for Commercial EV Charging Rollouts

- Designed integrated **EV charging solutions** for large commercial clients, specifying hardware, software, and network configurations to meet high-demand charging needs.
- Developed technical documentation and installation guides for a new line of **fleet charging stations**, enabling contractor teams to execute deployments more efficiently.
- Collaborated with a client's operations team to map out integration points for **smart grid connectivity**, ensuring seamless data flow for load balancing and energy management.

Backend System for Energy Load Management

- Engineered **Java Spring Boot** microservices to manage real-time energy consumption data from commercial charging sites, processing approximately 1,500 data points per minute.
- Implemented RESTful APIs for querying historical energy usage patterns and forecasting future demand, supporting the development of a **Power BI** dashboard for operational insights.
- Wrote **Python scripts** to automate data validation and ETL processes from various sensor inputs into a central PostgreSQL database, ensuring data integrity for reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
