PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed customer charging data against meter readings from **ESB Networks** and **GNI Meters**, identifying discrepancies and validating system accuracy for **PrepayPower**.
- Conducted detailed account analysis, including consumption validation and tariff checks, to pinpoint root causes of revenue discrepancies for energy customers.
- Managed non-performing accounts, including setting up and monitoring repayment plans, and coordinating escalations up to the point of supply disconnection.
- Investigated root causes of revenue protection exceptions through to resolution, liaising with internal teams, network operators, and third parties.
- Supported Revenue Protection Tier 1 staff by providing guidance on complex customer issues and standard operating procedures.
- Compiled and delivered regular reports to management on all Revenue Protection activities, tracking key performance indicators and SLA adherence.
- Containerized data processing scripts using **Docker** for consistent deployment across development and production environments on **AWS EC2**.

SKILLS

Analysis – Fraud Analysis, Consumption Analysis, Account Analysis, Numerical Analysis, Creative Problem-Solving.

Customer Management – Repayment Plans, Customer Communications, Escalated Accounts, Account Management, Customer Service.

Tools & Technologies – Excel, MS Office, SQL, Python, Docker, AWS EC2, Power BI, Tableau.

Domain Experience – Revenue Protection, Finance, Energy Industry, Metering, Charging Discrepancies.

Communication & Collaboration – Verbal Communication, Written Communication, Interpersonal Skills, Presentation Skills, Stakeholder Liaison.

PROJECTS

Energy Consumption Analysis Dashboard

- Developed interactive dashboards using **Power BI** to visualize energy consumption patterns and charging accuracy for enterprise customers.
- Integrated data from multiple sources including meter readings and customer account information using **Power Query** for ETL.
- Created **DAX measures** to calculate consumption variances and identify potential revenue leakage, presenting findings to business stakeholders.

Python Scripting for Account Reconciliation

- Automated the reconciliation of customer account charges against external billing systems using **Python** scripts.
- Engineered data pipelines to process and validate large volumes of transaction data, reducing manual effort by approximately **40%**.
- Implemented error handling and logging mechanisms to ensure data integrity and facilitate quick identification of processing issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
