PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided technical leadership for a team of 4 engineers, guiding them through complex bug resolution and backporting efforts for RHOAI components.
- Diagnosed and resolved critical issues impacting long-term product stability for Red Hat OpenShift AI, ensuring continuity for regional business operations.
- Collaborated with developer and QE teams globally to integrate backported CVE and bug fixes into stable release streams, adhering to stringent quality standards.
- Developed and maintained automated test suites for backported fixes, integrating them into a continuous integration workflow using Jenkins pipelines.
- Contributed to release pipeline preparation and build creation for maintenance streams, ensuring efficient and reliable patch delivery to customers.
- Engineered Python scripts to automate the deployment and monitoring of test environments on AWS EC2 instances, reducing manual setup time by approximately 40%.
- Containerized core maintenance tooling with Docker, enabling consistent deployment across different development and testing environments.

SKILLS

Languages – Python, Go

Containerization & Orchestration – Kubernetes, OpenShift, Docker

CI/CD & Automation – Jenkins, GitHub Actions, GitLab CI, PyTest, Cypress

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Operating Systems – Linux

Development Tools – Git, Jira, Confluence

PROJECTS

RHOAI Maintenance Automation Suite

- Developed a Python-based framework to automate the patching and testing cycle for Red Hat OpenShift AI components, integrating with Jenkins for CI/CD.
- Implemented automated test execution using PyTest for backported fixes on Kubernetes clusters, achieving 95% test coverage for core functionalities.
- Created shell scripts for log analysis and root cause identification of deployment failures within the RHOAI maintenance pipelines.

Automated CVE Backporting Tool

- Built a Python tool to automate the process of backporting Common Vulnerabilities and Exposures (CVEs) to stable OpenShift AI release streams.
- Integrated the tool with Git and Jenkins to manage code branching, apply patches, and trigger automated builds and deployments.
- Designed a modular structure allowing for easy extension to handle different types of bug fixes and security patches.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
