## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **data attributes** across multiple disparate data sources, ensuring consistency for downstream analytics.
- Supported **analytics and data quality initiatives** by performing root cause analysis on data discrepancies and implementing corrective actions.
- Collaborated with internal teams, including product and engineering, to deliver **business-focused solutions** through iterative development cycles.
- Designed and implemented **Python scripts** for data extraction, transformation, and loading (ETL) processes, improving data pipeline efficiency.
- Wrote and optimized complex **SQL queries** against relational databases (PostgreSQL, MySQL) for data validation and reporting purposes.
- Contributed to the development of **Java Spring Boot** applications, focusing on bug fixes and feature enhancements for existing microservices.
- Managed production environments using **Splunk and Dynatrace** for monitoring, incident response, and SLA adherence on enterprise applications.

## SKILLS

**Programming Languages** – Python, SQL, Java

**Databases** – Relational Databases, PostgreSQL, MySQL, Oracle

**Cloud & DevOps** – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins

**Data Analysis & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

**Machine Learning** – scikit-learn, pandas, NumPy, Statistical Methods

**Tools & Methodologies** – Jira, Confluence, Git, Agile, Scrum

## PROJECTS

### Data Quality Framework for Enterprise Systems

- Developed a comprehensive **Python-based framework** to automate data validation checks across critical enterprise systems, identifying ~15% of data integrity issues before production deployment.
- Integrated the framework with **SQL databases** (PostgreSQL, Oracle) to monitor key data attributes and trigger alerts for anomalies, reducing manual data reconciliation efforts.
- Created interactive **Power BI dashboards** to visualize data quality metrics and trends, providing actionable insights to business stakeholders for system improvement.

### Customer Transaction Analysis Platform

- Engineered **Python data pipelines** using pandas and NumPy to process and aggregate large volumes of transaction data, preparing features for analytical models.
- Performed **statistical analysis and hypothesis testing** on transaction patterns to identify key drivers of customer behavior, contributing to a 12% uplift in targeted marketing campaigns.
- Built and deployed a **REST API using Flask** to serve aggregated transaction data for downstream reporting tools, handling approximately 500 requests per minute.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
