PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Assisted with the return to service of aircraft grounded due to AOG (Aircraft on Ground) situations, coordinating technical defect resolution with engineering teams and flight crew.
- Liaised directly with flight crews and maintenance engineers to gather detailed technical defect information, ensuring accurate documentation for AOG recovery efforts.
- Reviewed and managed open HILs (Hold Item Lists) and other forecasting maintenance schedules to ensure planned tasks for fleet upkeep were being scheduled and accomplished.
- Supported the dispatch of the Lear Jet, coordinating the transport of engineers and critical spares to remote locations for urgent AOG recovery operations.
- Updated and distributed daily Tech Issue reports to provide fleet-wide visibility of AOG status and recovery progress to senior management and operations teams.
- Collaborated with cross-functional teams, including flight operations and engineering, to ensure smooth daily operations for over 3,600 flights, maintaining a calm demeanor during rapidly changing situations.
- Contributed to the continuous improvement of maintenance control processes by providing feedback on operational challenges and suggesting process refinements for incident management.

SKILLS

Aviation Maintenance – Aircraft on Ground (AOG) recovery, Technical Defect Reporting, Maintenance Planning, Flight Crew Liaison, Engineering Support, Lear Jet Dispatch.

Operations Management – Shift Work, Incident Response, Operational Smoothness, Multi-tasking, Calm under Pressure, Organizational Skills.

Technical Communication – Liaison, Technical Defect Explanation, Status Updates, Reporting.

Software & Tools – Jira, Confluence, Microsoft Office Suite (Excel, Word, Outlook).

Aviation Domain – Aircraft Maintenance, Fleet Operations, Engineering Teams, Flight Operations.

PROJECTS

Aircraft Technical Defect Triage and Resolution

- Developed a standardized process for triaging incoming technical defect reports from flight crew, ensuring critical issues were prioritized for AOG recovery.
- Integrated with the existing aircraft maintenance logs to cross-reference reported defects with historical repair data, aiding in faster root cause analysis.
- Collaborated with senior engineers to document common defect patterns and create a knowledge base for quicker resolution of recurring technical issues.

AOG Recovery Logistics Coordination

- Engineered a communication protocol between maintenance control and the flight dispatch team for the Lear Jet, ensuring timely and accurate requests for engineer and spare parts transport.
- Tracked the status of dispatched resources in real-time, providing updates to the maintenance control manager and affected flight crews to manage expectations during AOG events.
- Analyzed historical AOG recovery times to identify logistical bottlenecks and proposed process adjustments that reduced average dispatch lead times by approximately 18%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
