PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported procurement of aircraft parts to meet Line and Heavy Maintenance schedules, ensuring timely availability for operational needs.
- Monitored repair facilities and vendor performance to guarantee alignment with operational requirements and quality standards.
- Liaised with external vendors to address technical and commercial aspects of part repairs and procurement, facilitating efficient issue resolution.
- Arranged freight movements for aircraft parts and tooling across internal bases and external suppliers, optimizing logistics within the network.
- Collaborated with Engineering and Technical Services teams on purchasing and warranty matters, contributing to cost control and asset management.
- Assisted in the pricing and approval of repair orders, ensuring cost-effectiveness and adherence to budgetary guidelines for aircraft components.
- Managed Linux shell scripts for automated log analysis and cron job scheduling to maintain system health for enterprise applications.

SKILLS

Core Skills – Procurement, Repair Control, Warranty Control, Vendor Management, Logistics, Cost Control, Negotiation, Multitasking, Communication, Problem-Solving

Engineering & Operations – Aircraft Parts Support, Line Maintenance, Heavy Maintenance, Modification Programs, Maintenance Control, Technical Services

Software & Tools – Microsoft Word, Microsoft Excel, Jira, Confluence, Splunk, Dynatrace, CloudWatch, Jenkins, Git

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs

Cloud & Infrastructure – AWS, EC2, S3, Lambda, Docker, Linux

Data Analysis & BI – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Data Modelling

PROJECTS

Aircraft Parts Inventory Optimization (HCL Technologies)

- Developed Python scripts to analyze historical part usage data and forecast demand for critical aircraft components, reducing stockouts by 15%.
- Designed and implemented automated data pipelines using SQL (PostgreSQL) to aggregate inventory levels from multiple HCL enterprise systems, providing a unified view.
- Created interactive Power BI dashboards to visualize inventory status, repair lead times, and vendor performance metrics for operational stakeholders.

Production Support Automation for Financial Operations (HCL Technologies)

- Automated the monitoring and alerting process for failed transaction messages on a financial-services dashboard using Python scripting and Splunk queries.
- Reduced manual triage time for P1/P2 incidents related to payment processing by 30% through enhanced log analysis and automated root cause identification.
- Collaborated with operations teams to refine alerting thresholds and develop runbooks for common failure scenarios, improving incident response efficiency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
