PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Automated routine operational tasks by developing **Python scripts** for data processing and scheduled reporting, reducing manual effort by an estimated **15%**.
- Assisted in building and maintaining **CI/CD pipelines** using **Jenkins** for various Java applications, facilitating smoother code deployments and integration.
- Supported cloud infrastructure management on **AWS**, specifically EC2, S3, and Lambda, under senior engineer guidance, ensuring operational stability.
- Helped maintain and improve **Kubernetes cluster** operations and supporting services, contributing to system reliability and scalability.
- Contributed to **GitOps workflows** using **Argo CD** for declarative, auditable deployments, enhancing deployment consistency.
- Maintained observability tooling, including metrics, logging, and alerting with **Prometheus** and **Grafana**, ensuring system health visibility.
- Participated in incident management processes, assisting in triage and contributing to post-incident reviews for P1/P2 issues.

SKILLS

Cloud Platforms – Microsoft Azure, AWS

Containerization & Orchestration – Kubernetes, AKS, Docker, Helm charts, Argo CD

CI/CD – Jenkins, Azure DevOps

Infrastructure as Code – Terraform, Terragrunt, Bicep, ARM templates

Observability – Prometheus, Grafana, Azure Monitor, OpenTelemetry, Splunk, Dynatrace

Scripting & Programming – Python, Bash, PowerShell, Go, Java, Spring Boot

Operating Systems – Linux, Windows

PROJECTS

Automated Deployment Pipeline Enhancement

- Developed and integrated **Python scripts** into an existing **Jenkins** CI/CD pipeline to automate build, test, and deployment stages for a Java Spring Boot application.
- Implemented automated rollback procedures within the pipeline, reducing recovery time from critical deployment failures by approximately **30%**.
- Containerized the application using **Docker**, ensuring consistent environments across development, testing, and production stages.

Cloud Infrastructure Monitoring & Alerting

- Configured and maintained **Prometheus** and **Grafana** for real-time monitoring of cloud resources on **AWS**, visualizing key performance indicators.
- Established alert rules within the system to notify operations teams of potential issues, decreasing average detection time for performance degradations by **20%**.
- Documented setup procedures and operational runbooks for the monitoring stack, enabling faster onboarding for new team members.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
