PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and implemented **Java Spring Boot** microservices for core backend functionality, focusing on building reusable platform components.
- Developed and maintained **Java applications** using **Hibernate** and **JPA** for data persistence, ensuring efficient database interactions across PostgreSQL and Oracle.
- Wrote comprehensive **JUnit tests** and utilized **Mockito** for mocking dependencies, achieving over 90% code coverage for critical Java modules.
- Collaborated with product engineers to define and implement **shared platform capabilities**, aligning technical standards across multiple development teams.
- Participated in **code reviews** and **technical estimations** for new feature development, contributing to sprint planning and Agile ceremonies.
- Containerized backend services using **Docker** and deployed them to **Kubernetes clusters** on AWS, managing configurations and basic resource allocation.
- Analyzed **system performance data** and identified optimization opportunities, contributing to improved platform resilience and developer productivity for approximately 15 engineers.

SKILLS

Languages – C#, .NET Core, Java, Python, SQL, English

Cloud & Orchestration – Kubernetes, Azure, AWS, GCP, Docker

Backend Frameworks – .NET Core, Spring Boot, Hibernate, JPA, FastAPI

Messaging & Data – Kafka, RabbitMQ, Elasticsearch, PostgreSQL, MySQL, Oracle

DevOps & Tools – Jenkins, Git, Jira, Confluence, Prometheus, Grafana, Splunk, Dynatrace, Terraform

PROJECTS

Core Platform Services Development (HCL Technologies)

- Designed and built **Java Spring Boot**-based microservices to serve as shared infrastructure components for enterprise applications, enabling cross-team code reuse.
- Implemented data access layers using **Hibernate** and **JPA**, interacting with **PostgreSQL** databases to manage core platform data, processing approximately 5,000 transactions daily.
- Developed RESTful APIs for inter-service communication, adhering to strict contract definitions and incorporating error handling patterns for enhanced reliability.

Kubernetes-based CI/CD Pipeline Implementation (HCL Technologies)

- Containerized multiple Java applications using **Docker** and orchestrated their deployments on an **AWS EKS** cluster, reducing deployment times by an average of 40%.
- Configured **Jenkins pipelines** for automated build, test, and deployment, integrating with Git for version control and enabling faster release cycles for platform updates.
- Managed application configurations and resource definitions within **Kubernetes**, ensuring consistent environments across development, staging, and production.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
