PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Translated complex business needs into clear technical requirements for engineering teams, facilitating sprint planning and feature prioritization for a **data services platform**.
- Collaborated with **Data Engineers** to refine requirements, define comprehensive test cases, and gain deep understanding of system architectures and **data flows**.
- Managed the end-to-end lifecycle of features, from initial concept through development, rollout, and ongoing operational monitoring, ensuring alignment with strategic goals.
- Maintained system health visibility and control by effectively using a **digital toolkit** including **Git**, **Jenkins**, and various **monitoring dashboards**.
- Improved system reliability at scale by implementing structured processes for moving services from 'working' to 'production-ready' across the engineering team.
- Developed and maintained **Python** automation scripts for data extraction and reporting, reducing manual effort by approximately **20%** for the operations team.
- Containerized Java Spring Boot services using **Docker** and deployed them to **AWS EC2** instances, enhancing deployment consistency and reducing configuration drift.

SKILLS

Product Management – Technical Requirements, Feature Lifecycle Management, Agile Methodologies, Sprint Planning, Test Case Definition, Stakeholder Collaboration

Development Tools – Git, Jenkins, Docker, Jira, Confluence

Programming Languages – Java, Python, SQL

Cloud Platforms – AWS (EC2, S3, CloudWatch)

Data Concepts – ETL, Data Flows, Data Services, Monitoring Dashboards

Operating Systems – Linux

PROJECTS

Data Services Platform Requirements Definition

- Defined and documented technical requirements for a new **data services platform**, translating business objectives into actionable specifications for development teams.
- Collaborated with **Data Engineers** to map out complex **data flows** and identify critical integration points for the platform.
- Developed comprehensive test cases and acceptance criteria to ensure delivered features met both business and technical quality standards.

Java Application Support & Automation

- Provided production support for enterprise Java applications, responding to incidents and ensuring adherence to SLAs using **Splunk** and **Dynatrace**.
- Automated recurring reporting tasks using **Python** scripting, reducing report generation time by an average of **30%**.
- Managed change control processes for system configuration updates, coordinating UAT and post-go-live support for interconnected enterprise systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
