PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and trained a **gradient-boosted classifier** using **scikit-learn** on a dataset of **~280,000 transactions** to identify fraudulent activity, achieving an **AUC of 0.86** on held-out validation data.
- Engineered **Python feature pipelines** on **AWS Lambda** and **S3** to process an average of **3,500 events per second** during peak hours, replacing a less efficient scheduled batch job.
- Designed and implemented **Java Spring Boot REST APIs** for inter-service communication, incorporating request validation and **circuit-breaker patterns** to enhance system resilience.
- Collaborated with enterprise customers to gather **feature pipeline requirements**, translating them into actionable **Python implementations** for an internal ML platform.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS Kubernetes cluster**, configuring **Helm charts** for predictable deployments.
- Wrote comprehensive production runbooks and internal documentation that reduced customer onboarding time from over 4 weeks to approximately **10 days**.
- Participated in post-sales technical sessions with customer engineering teams, pair-debugging integration issues within their production environments.

SKILLS

Machine Learning – scikit-learn, gradient boosting, classification, AUC, model training, feature engineering, evaluation metrics.

Programming Languages – Python, Java, SQL, R.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git, CI/CD.

Backend Frameworks – Spring Boot, FastAPI, Flask.

Data Handling & Analysis – pandas, NumPy, RStudio, DAX, Power Query, data modelling, data warehousing.

Databases – PostgreSQL, MySQL, Oracle.

Observability & Support – Splunk, Dynatrace, Linux, shell scripting.

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Developed a guided onboarding flow for two pilot enterprise customers adopting an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python CLI** to validate customer feature definitions against the platform schema, catching approximately **70% of schema errors** at write time.
- Conducted technical workshops with customer data teams to upskill their engineers on platform integration patterns.

Transaction Anomaly Detection Model

- Engineered a **Python feature pipeline** using SQL to extract behavioural signals from a transaction log of approximately **1.1 million records**.
- Trained a **LightGBM classifier** on extracted features, tuning class weights for a 1:140 fraud imbalance, and achieving **0.91 AUC** on a held-out month.
- Packaged the trained model behind a **FastAPI inference endpoint** with input validation, achieving a p95 latency of approximately **180ms**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
