PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Java Spring Boot** REST APIs for inter-service communication, handling approximately **2,000 requests per minute** and integrating with PostgreSQL.
- Implemented **Hibernate** ORM mappings and optimized SQL queries to improve data retrieval efficiency for core application modules, reducing average query times by **22%**.
- Designed and implemented **JUnit** and **Mockito** test suites for critical Java components, increasing code coverage by **35%** and reducing production defects by **15%**.
- Collaborated with product managers to define technical specifications for new features, translating business requirements into actionable development tasks within an **Agile/Scrum** framework.
- Participated in code reviews for a team of 4 engineers, ensuring adherence to coding standards and identifying potential performance bottlenecks in proposed solutions.
- Containerized multiple Java microservices using **Docker** and deployed them to an **AWS EC2** environment, streamlining the development and deployment lifecycle.
- Authored detailed technical documentation and operational runbooks for newly deployed services, enabling faster incident response and knowledge transfer for the support team.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven, Gradle

Database & Data Management – SQL, PostgreSQL, MySQL, Oracle, Database Design, Data Modelling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git

Scripting & Automation – Python, Shell Scripting

Observability & Monitoring – Splunk, Dynatrace

Project Management & Collaboration – Agile, Scrum, Jira, Confluence

PROJECTS

Enterprise Java Backend Service Modernization

- Refactored a monolithic Java application into a set of **Spring Boot** microservices, improving modularity and enabling independent deployments.
- Integrated **Hibernate** with PostgreSQL to manage application data persistence, developing efficient data access objects (DAOs) for CRUD operations.
- Implemented comprehensive unit and integration tests using **JUnit**, achieving over **85% code coverage** for critical service logic.

Automated Data Reconciliation Service

- Developed a Python-based service to automate the reconciliation of financial transaction data between two disparate systems.
- Engineered data pipelines using **pandas** to extract, transform, and load data from source databases (SQL Server, Oracle) into a staging area for comparison.
- Shipped the service with a command-line interface and integrated it into a scheduled reporting workflow using cron jobs on a Linux environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
