PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided **central technical contact** for troubleshooting and fault diagnosis on critical infrastructure equipment, analysing issues to recommend corrective actions and ensure timely resolutions.
- Supported **field service engineers** and internal teams by diagnosing complex equipment issues, guiding them through fault patterns, and ensuring customers received accurate, timely technical responses.
- Contributed to **operational reliability** and overall service performance by capturing, retaining, and sharing technical knowledge across the service organisation, developing documentation for support teams.
- Managed **production support** for enterprise applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace** to maintain service continuity.
- Developed **Python scripts** for automation of data pipelines and scheduled reporting, enhancing data processing efficiency for internal operations.
- Implemented **Java Spring Boot** features and bug fixes for backend services, including the development of **REST APIs** for cross-service data exchange.
- Containerised applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring efficient resource utilization and application stability.

SKILLS

Technical Support – Troubleshooting, Fault Diagnosis, Technical Escalation, Problem-Solving, Service Delivery, Root Cause Analysis

Engineering Domains – Mechanical Equipment, Electrical Equipment, Rotating Equipment, Pumps, Industrial Maintenance, Service Engineering

Programming Languages – Java, Python, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, REST APIs, pandas, NumPy

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Splunk, Dynatrace, Jenkins, Git, Jira, Confluence, Agile, Scrum

PROJECTS

Industrial Equipment Diagnostics and Support Platform

- Developed a **Java Spring Boot application** to centralize diagnostic information and support requests for field engineers, integrating with a **PostgreSQL** database for issue tracking.
- Engineered **REST APIs** to allow service engineers to submit fault reports and access technical documentation, improving information flow between field operations and technical experts.
- Implemented automated data validation using **Python scripts** to pre-process incoming fault data, reducing manual triage time by approximately **15%**.

Production Monitoring and Automation Suite

- Built automated monitoring dashboards using **Splunk** and custom **Python** scripts to track critical system health metrics and alert on anomalies, improving proactive issue detection.
- Developed **shell scripts** for log analysis and system health checks on **Linux** servers, automating routine maintenance tasks and reducing manual intervention by nearly **20%**.
- Managed **CI/CD pipelines** with **Jenkins** for deployment of support tools and automation scripts, ensuring consistent and reliable delivery to production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
