PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs supporting core financial transaction processing, handling approximately 5,000 requests per minute during peak hours.
- Designed and implemented **Hibernate** entities and JPA query optimization for a high-volume data ingestion service, reducing average query execution time by **22%**.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito** for a critical microservice, achieving over **90%** code coverage and reducing post-deployment defects by **15%**.
- Collaborated with senior analysts and traders to evaluate and track special situations, including mergers and acquisitions, providing actionable insights for investment decisions.
- Performed detailed stock valuation analysis using fundamental research principles and identified potential investment opportunities by analysing upcoming corporate events.
- Provided real-time opinions on breaking news events, synthesizing information rapidly to support immediate trading strategy adjustments.
- Containerized multiple backend services using **Docker** and deployed them to an **AWS EKS** cluster, managing configuration and resource allocation for improved stability.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Analytics/BI – Power BI, Tableau, DAX, Power Query, RStudio, Data Modelling, Data Warehousing

Financial Analysis – Stock Valuation, Corporate Actions, Event Driven Analysis, Derivative Products, Financial Research

Tools – Jira, Confluence, Splunk, Dynatrace

PROJECTS

Event-Driven Research Platform (HCL Technologies)

- Developed a **Python**-based event processing system to ingest and analyse market news feeds, identifying potential event-driven opportunities for research analysts.
- Implemented **FastAPI** endpoints to serve real-time analysis results and event triggers to downstream trading applications, processing approximately 1,500 events per hour.
- Designed and executed **SQL** queries against historical market data to backtest event-driven strategy hypotheses, contributing to the refinement of analytical models.

Corporate Actions Analysis Tool (MSc Project)

- Built a **Power BI** dashboard to visualize and track key corporate actions (mergers, acquisitions, stock splits) across a portfolio of 200+ companies, enabling easier monitoring for stakeholders.
- Developed data extraction and transformation scripts using **Power Query** and **DAX** measures to aggregate and analyse financial impact data from diverse public sources.
- Performed statistical analysis on historical event data using **R** to identify patterns and predict potential market impacts, informing valuation models.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
