PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed daily trade matching and settlement operations for Equities, Bonds, and ETFs, ensuring adherence to strict client service levels and regulatory impact.
- Liaised with internal departments including Trading Desks, Technology, and Trade Support to maintain high settlement rates and optimize service delivery to traders.
- Monitored and analyzed daily buy-in notices from Exchanges and Direct Market Access providers, proactively communicating with relevant parties to manage critical trades and mitigate settlement risks.
- Investigated and analyzed interest claims, fines, and buy-ins, recommending strategic adjustments to trading activities to reduce associated costs.
- Contributed to strategic initiatives aimed at enhancing operational efficiency within the settlements process, identifying and implementing automation opportunities.
- Developed and maintained relationships with Prime Brokers and Execution Brokers to ensure smooth settlement processes and high service standards.
- Designed and implemented Python scripts to automate the generation of monthly management reports on trading volume, interest claims, and trade fails, reducing manual effort by approximately 40%.

SKILLS

Financial Markets – Global Settlements, OTC Trades, Client Trades, Exchange Trades, Equities, Bonds, ETFs, Prime Broker, Execution Broker, Trade Support, Trading Desks, Securities Lending, Corporate Actions

Settlements Platforms & Tools – CTM, Traiana, SSI's, Microsoft Office Suite, Excel, SQL, Python

Core Competencies – Client Focus, Process Improvement, Automation, Analytical Skills, Problem Solving, Attention to Detail, Organizational Skills, Communication (Verbal & Written), Adaptability, Multi-tasking, Working Under Pressure

Technical Skills – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux, Git, Jenkins, Jira, Splunk, Dynatrace, Power BI, Tableau, R, pandas, NumPy, scikit-learn

Enterprise Systems – ERP Integration Support, Change Management, Production Support, Incident Response, SLA Management

PROJECTS

Automated Trade Reconciliation Workflow (HCL Technologies)

- Developed a Python-based reconciliation workflow to compare trade execution data against settlement confirmations, identifying discrepancies for ~2,800 trades weekly.
- Engineered ETL processes using pandas to extract and transform data from disparate sources (SQL databases and flat files), standardizing formats for analysis.
- Implemented automated data validation checks and exception reporting, reducing manual reconciliation effort by an estimated 35% for the financial operations team.

Financial Operations Dashboard Enhancement

- Designed and built interactive dashboards in Power BI to visualize key settlement metrics, including trade volumes, settlement rates, and exception types.
- Created complex DAX measures to calculate rolling averages and year-over-year comparisons for monthly management reports, improving data accessibility for stakeholders.
- Integrated data from PostgreSQL and Oracle databases using Power Query, streamlining the data preparation phase for reporting cycles.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
