PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and shipped **Java Spring Boot** REST APIs to facilitate cross-service data exchange, incorporating request validation and circuit-breaker patterns for enhanced resilience.
- Engineered **Python scripts** to automate ETL processes for data warehousing, transforming and loading approximately 500 GB of daily transactional data into analytical databases.
- Managed production support for enterprise applications using **Splunk and Dynatrace**, achieving a 98% SLA adherence rate for critical P1/P2 incidents across a portfolio of 15 services.
- Authored detailed product specifications and acceptance criteria for new features, translating complex user needs into actionable tasks for engineering teams.
- Owned end-to-end feature lifecycle, from initial discovery and prioritization through development, release, and post-launch performance measurement.
- Analyzed user funnels and churn signals using **SQL** to inform product roadmap decisions, presenting data-driven insights to cross-functional stakeholders.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Concepts – REST APIs, ETL, Data Warehousing, CI/CD, Agile Methodologies, AI/ML Fundamentals

PROJECTS

API-Driven Data Ingestion Service (HCL Technologies)

- Built a scalable **Java Spring Boot** service to ingest and process high-volume transaction data from various sources via REST APIs, handling approximately 3,000 requests per minute.
- Implemented asynchronous processing using message queues to decouple ingestion from downstream processing, improving system throughput by **40%**.
- Developed comprehensive unit tests with **JUnit** and Mockito, achieving over **85%** code coverage for critical API endpoints and data transformation logic.

Customer Analytics Dashboard (MSc Capstone)

- Developed interactive **Power BI** dashboards to visualize customer behavior patterns and identify key churn indicators for a retail analytics project.
- Engineered data transformation pipelines using **Power Query** and **DAX** to prepare and model approximately 1.5 million customer records for analysis.
- Presented data-driven insights and actionable recommendations to project stakeholders, influencing strategy for customer retention initiatives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
