## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Served as the primary technical liaison for enterprise clients, analyzing and clarifying complex technical inquiries for Tenable products.
- Troubleshoot and diagnosed issues by recreating customer software problems within a dedicated lab environment, ensuring accurate resolution paths.
- Developed and published detailed solution knowledge base articles and technical documentation, enabling faster self-service for customers and internal teams.
- Analyzed vulnerability scan results and system audit logs to identify potential risks and provide actionable remediation advice to customers.
- Gained in-depth knowledge of Tenable's cybersecurity product suite and industry best practices to effectively support diverse customer environments.
- Managed multiple technical priorities in a fast-paced environment, ensuring timely resolution of critical customer issues and meeting business needs.
- Automated routine case analysis using AI-driven tools to accelerate issue resolution and enhance the overall customer support experience.

## SKILLS

---

**Cybersecurity Tools** – Nessus, vulnerability assessment, compliance auditing

**Operating Systems** – Linux, Windows, MacOS

**Networking** – TCP/IP

**Cloud & Virtualization** – AWS, Azure, Docker, Kubernetes

**Databases** – SQL, PostgreSQL, MySQL, Oracle, MSSQL

**Support Tools** – JIRA, Salesforce, Zendesk, Splunk, ElasticSearch, Wireshark

**Programming Languages** – Python, Java, Bash

## PROJECTS

---

### Enterprise Application Support & Automation

- Provided production support for enterprise Java applications, monitoring system health using **Splunk** and **Dynatrace**, and managing P1/P2 incidents to meet strict SLAs.
- Automated data extraction and reporting tasks using **Python scripting**, reducing manual effort for the operations team by approximately 15 hours per week.
- Performed ad-hoc data analysis and validation queries across **PostgreSQL** and **Oracle** databases to support system integrations and data integrity checks.

### Customer Issue Replication & Analysis

- Recreated complex software issues reported by enterprise clients in a controlled lab environment to isolate root causes for the R&D team.
- Analyzed system logs and diagnostic information from customer environments, correlating events from multiple sources to pinpoint failure points.
- Documented troubleshooting steps and findings in a clear, concise manner for escalation and knowledge sharing, improving the efficiency of the support process.

## EDUCATION

---

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
