PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** to handle core business logic, processing approximately 4,500 requests per minute during peak hours.
- Engineered **Python ETL pipelines** to automate data ingestion and transformation from disparate sources into a centralized data warehouse, reducing manual processing time by 30%.
- Designed and implemented **relational database schemas** and optimized complex SQL queries across PostgreSQL and Oracle databases, improving report generation speed by an average of 22%.
- Built and maintained **CI/CD pipelines using Jenkins** and Git for automated testing and deployment of Java applications, cutting deployment cycles from days to hours.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2 instances**, ensuring consistent environments across development and production.
- Responded to and resolved P1/P2 incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace** to maintain service level agreements.
- Collaborated with cross-functional teams to gather requirements for new features and enhancements on an internal **payments operations dashboard**, supporting regulatory compliance efforts.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, NoSQL (Concepts)

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, Data Analytics, Machine Learning Fundamentals, ETL

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java modules into a scalable **Spring Boot microservice architecture**, improving system resilience and enabling independent feature deployments.
- Implemented **JPA and Hibernate** for efficient data persistence and retrieval, optimizing database interactions and reducing query load by 20% for critical transactions.
- Developed comprehensive unit and integration tests using **JUnit and Mockito**, achieving over 85% code coverage and significantly reducing post-deployment defects.

Automated Financial Transaction Reconciliation

- Engineered a **Python-based reconciliation engine** that automatically matched and validated high-volume financial transaction records from multiple sources.
- Developed **SQL scripts and stored procedures** to extract and pre-process data from PostgreSQL and Oracle databases, preparing it for the reconciliation process.
- Created **Power BI dashboards** to visualize reconciliation status, exceptions, and key performance indicators for operations teams, enabling faster issue identification.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
