PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed requests for standard outbound extracts, including **Spos 4x**, **Standard Trade**, and **Taxlot** data, ensuring timely delivery for client reporting.
- Configured and maintained electronic interfaces for outbound data exchange from internal applications, addressing post-implementation discrepancies as required.
- Provided level one support and troubleshooting for standard extract generation errors, collaborating with internal Operations and Client Integration teams to resolve issues.
- Assisted management in the design and implementation of workflow processes for outbound reporting, identifying opportunities for increased efficiencies and automation.
- Researched and resolved data issues reported by operations teams, determining root causes and implementing workarounds to maintain reporting integrity.
- Engaged with Data Management teams to ensure the correct delivery of standard extracts to clients and vendors, maintaining communication channels for reporting needs.
- Developed Python scripts to automate the generation and validation of daily operational reports, reducing manual effort by approximately **15 hours** per week.

SKILLS

Data Operations – Standard Extracts, Client Reporting, Vendor Data Exchange, Outbound Data, Data Integrity

Technical Skills – SQL, Python, T-SQL, MS Excel, Microsoft Office Suite

Financial Services – Fund Administration, Hedge Funds, Portfolio Data, Trade Processing, Pricing Data

Databases – SQL Server, PostgreSQL, MySQL, Oracle

Programming – Python, Java, Spring Boot, REST APIs

Cloud & DevOps – AWS, Docker, Jenkins, Git

PROJECTS

Automated Client Reporting Suite (HCL Technologies)

- Developed a Python-based suite to automate the extraction and formatting of client-specific financial data, replacing manual processes that were prone to errors.
- Integrated with PostgreSQL and Oracle databases to pull transaction and position data for over **50 client accounts**, ensuring data accuracy and consistency.
- Built automated validation checks within the scripts to flag discrepancies against predefined reconciliation rules, improving data quality for downstream reporting.

Data Interface Configuration & Monitoring Tool (HCL Technologies)

- Designed and implemented a Python application to manage and monitor configurations for various outbound data interfaces used by financial services clients.
- Created REST API endpoints using Flask to allow dynamic updates to interface configurations and developed monitoring dashboards to track interface health and data flow volumes.
- Managed the secure decommissioning of **3 legacy reporting interfaces**, ensuring data archival and compliance with client data retention policies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
