PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python**-based RESTful APIs using **FastAPI** for core middle office solutions, processing over 1,500 requests per minute.
- Designed and implemented database schemas and optimized **PostgreSQL** queries for new application modules, improving data retrieval times by an average of **30%**.
- Contributed to the development of a **React 18** front-end application, integrating **Material UI** components and enhancing user experience for treasury operations.
- Collaborated with the IT Technical Lead to define technical specifications and estimate effort for new feature development cycles within an Agile framework.
- Wrote comprehensive unit and integration tests for new functionalities, adhering to **test-driven development** principles and achieving over **85%** code coverage.
- Managed system documentation and updated the knowledge base for support teams, reducing common issue resolution time by approximately **20%**.
- Containerized microservices using **Docker** and deployed them to **AWS** environments, ensuring efficient resource utilization and scalability.

SKILLS

Backend Development – Python, FastAPI, RESTful Web Services, APIs, Service Oriented Architectures, Pydantic, JWT

Frontend Development – React 18, TypeScript, Material UI/MUI

Cloud & DevOps – AWS Cloud Platform, Docker, Code Generation Tools, Amazon Q, Co-pilot

Databases – PostgreSQL

Methodologies – Test-Driven Development (TDD), Agile

General – Debugging, Research, Investigation, Analytical Skills, Problem Solving, Communication Skills

PROJECTS

Middle Office Operations Platform Enhancement

- Developed a new **Python** module for the middle office platform using **FastAPI**, integrating with existing **PostgreSQL** data stores to manage trade operations.
- Built interactive UI components in **React 18** with **Material UI** to visualize trade settlement statuses, improving operational oversight for the business team.
- Implemented robust API endpoints with **JWT** authentication for secure data exchange between the new module and legacy systems, ensuring data integrity.

Automated Trade Reconciliation Service

- Engineered a **Python** service to automate trade reconciliation checks, comparing transaction data from multiple sources and flagging discrepancies.
- Containerized the reconciliation service using **Docker** and configured its deployment on **AWS**, enabling scheduled execution and monitoring via **CloudWatch**.
- Developed RESTful APIs in **Python** to expose reconciliation results, facilitating integration with downstream reporting tools and user dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
