PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for core enterprise systems, implementing robust error handling and request validation patterns.
- Engineered Python scripts to automate data extraction and transformation tasks from PostgreSQL and Oracle databases, supporting scheduled reporting for financial operations.
- Managed production support for enterprise applications on AWS infrastructure, responding to P1/P2 incidents using Splunk and Dynatrace for root cause analysis and SLA adherence.
- Contributed to the development of software modules in accordance with coding guidelines, ensuring adherence to company QA and software quality processes.
- Organized and conducted code reviews for own work products, focusing on maintainability, performance, and alignment with team standards.
- Implemented fixes and changes for assigned tickets, meticulously tracking issues and progress within the Jira and Confluence ecosystem.
- Containerized Java Spring Boot microservices using Docker for deployment to AWS EC2 instances, managing image builds and basic configuration within Jenkins CI/CD pipelines.

SKILLS

Languages – Java, Python, SQL, C/C++, R

Frameworks/Libraries – Spring Boot, Spring, pandas, NumPy, scikit-learn, Hibernate, JPA, NestJS

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes, Terraform

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio, Linux, Shell Scripting

Methodologies – Agile, Scrum, CI/CD, TDD

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Refactored legacy Java modules into a microservices architecture using Spring Boot, improving system modularity and deployability.
- Implemented data persistence layers with Hibernate and JPA, optimizing database interactions for an internal financial services dashboard to handle ~3,200 transaction messages per hour.
- Developed comprehensive JUnit and Mockito test suites for new Java services, achieving over 85% code coverage and reducing post-deployment defects by 18%.

Automated Reporting Pipeline with Python (HCL Technologies)

- Designed and built a Python-based ETL pipeline to ingest and transform data from disparate enterprise systems into a unified data warehouse for operational reporting.
- Automated the generation of weekly status reports from the ERP system using Python scripts and SQL queries against PostgreSQL, saving approximately 4 hours of manual effort per week for the operations team.
- Implemented data validation checks within the pipeline to ensure data integrity before loading into the reporting database, reducing data discrepancy issues by ~22%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
