PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise services, implementing new features and resolving defects to support critical business logic.
- Engineered **Python scripts** to automate data ingestion and transformation tasks, processing approximately 15,000 records daily for scheduled reporting and ETL workflows.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 alerts and performing root cause analysis to maintain service level agreements.
- Contributed to the development and maintenance of software modules for embedded systems, adhering to coding guidelines and contributing to the team's overall delivery.
- Organized and conducted **code reviews** for own work product and junior team members, ensuring adherence to coding standards and improving overall code quality.
- Executed comprehensive **module testing** and generated detailed test reports to validate functionality and performance of developed software components.
- Containerized Java Spring Boot applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, C, C++

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools – Jira, Confluence, Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Maintenance and Enhancement

- Maintained and enhanced a core enterprise **Java Spring Boot** application, implementing bug fixes and minor feature enhancements based on user feedback.
- Developed **REST APIs** for inter-service communication, ensuring seamless data flow and integration between disparate application modules.
- Wrote unit tests using **JUnit** to ensure code quality and maintainability, contributing to a 15% reduction in post-deployment defects.

Python-Based Data Processing Pipeline

- Developed an automated **Python** data processing pipeline to ingest, clean, and transform data from multiple sources, handling up to 10,000 records per run.
- Implemented data validation checks and error handling within the pipeline to ensure data integrity and accuracy for downstream reporting.
- Scheduled and monitored pipeline execution using cron jobs on Linux, ensuring timely delivery of processed data for business analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
