PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Power BI dashboards** and reports, translating complex construction project data into actionable insights for stakeholders across project controls, commercial, and finance teams.
- Modeled, transformed, and cleansed data from diverse sources including **ERP systems**, Excel, and **SQL databases** using **Power Query (M)** and **DAX** to ensure data integrity for reporting.
- Collaborated with business stakeholders to gather requirements for new reports and dashboards, translating these needs into clear, visually intuitive **data visualizations** that supported data-driven decision-making.
- Supported the automation of recurring manual reporting processes, developing **Python scripts** to streamline data extraction and transformation tasks, reducing manual effort by an estimated **15%**.
- Applied and promoted best practices in **BI development** and data visualization, ensuring consistency, quality, and governance across all reporting outputs.
- Assisted in the integration of **AI features (Copilot)** with Power BI semantic models, enabling natural language Q&A; capabilities across reporting suites.
- Managed and maintained comprehensive documentation for dashboards, datasets, and reporting processes, ensuring knowledge transfer and adherence to development standards.

SKILLS

BI Development – Power BI, DAX, Power Query (M), Data Modelling, Data Visualisation

Data Management – SQL, ETL, Data Cleansing, Data Transformation, ERP Systems

Programming & Scripting – Python, R

Cloud & Data Platforms – AWS, S3, Lambda, CloudWatch

Development Tools – Git, Jenkins, Jira, Confluence

PROJECTS

Construction Project Performance Dashboard

- Designed and implemented a comprehensive **Power BI dashboard** to track key performance indicators for construction projects, integrating data from project management tools and ERP systems.
- Developed complex **DAX measures** to calculate project timelines, budget adherence, and resource allocation, providing real-time visibility to project managers and executives.
- Created interactive visualizations that allowed stakeholders to drill down into project-specific data, identifying potential risks and opportunities for improved project controls.

Automated Financial Reporting Pipeline

- Built an automated data pipeline using **Python scripts** and **SQL** to extract, transform, and load financial data from multiple sources into a centralized data warehouse.
- Developed scheduled reports and alerts to inform the finance team of critical financial metrics and deviations, reducing manual reporting time by approximately **20%**.
- Implemented data validation checks within the pipeline to ensure accuracy and consistency of financial data presented in downstream reports and dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
