PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling over 2,000 requests per minute during peak loads, and ensuring seamless data exchange across microservices.
- Implemented complex business logic and bug fixes in **Java EE** applications, adhering to OOP principles and utilizing **JUnit** for unit testing to maintain code quality.
- Managed persistence layers using **Hibernate** and **JPA** for enterprise applications, optimizing database interactions and ensuring data integrity across multiple PostgreSQL and Oracle schemas.
- Collaborated with cross-functional teams to define technical requirements and estimate effort for new features within an Agile Scrum framework, contributing to sprint planning and backlog grooming.
- Reviewed code submitted by junior engineers, providing constructive feedback to improve code quality, maintainability, and adherence to team standards.
- Containerised multiple Java applications using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and network settings for consistent environments.
- Analyzed system performance and identified bottlenecks using **Splunk** and **Dynatrace**, contributing to incident response and root cause analysis for P1/P2 production issues.

SKILLS

Languages – Java, Python, SQL, R, TypeScript

Frameworks/Libraries – Spring Boot, Spring Cloud, Hibernate, JPA, Flask, FastAPI, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Modernisation (HCL Technologies)

- Refactored a monolithic Java application into a microservices architecture using **Spring Boot**, improving modularity and enabling independent deployment cycles.
- Integrated **Hibernate** with **PostgreSQL** to manage data persistence for core business entities, enhancing data retrieval performance by 18% through query optimization.
- Developed comprehensive RESTful APIs with clear contracts for inter-service communication, ensuring robust error handling and efficient data transfer.

Rail Network Capacity Simulation Tool (MSc Project)

- Developed a simulation model in **Python** using **NumPy** and custom logic to analyze train scheduling and identify potential capacity bottlenecks across a simulated rail network.
- Visualized simulation outputs and key performance indicators (e.g., delay propagation, throughput) using **Matplotlib** and basic dashboarding principles to present findings.
- Applied statistical methods to interpret simulation results, providing actionable insights on network improvements to stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
