PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, deployed, and managed **AWS infrastructure** using **EC2**, **S3**, and **RDS**, ensuring high availability for critical applications.
- Implemented and maintained **IAM policies** and **VPC configurations** to enforce granular access control and network segmentation.
- Automated infrastructure provisioning and configuration management using **Terraform**, reducing manual deployment time by 60% for new environments.
- Developed and maintained **Python scripts** to automate operational tasks, including log analysis and resource cleanup, saving approximately 15 hours of manual work per week.
- Monitored system performance and troubleshooted issues across distributed systems using **AWS CloudWatch**, identifying and resolving performance bottlenecks within the first 24 hours of incidents.
- Ensured **robust security practices** and compliance by implementing security group rules, encryption for data at rest and in transit, and regular vulnerability scans.
- Collaborated with cross-functional teams in a **remote setting** to define requirements and deliver scalable, resilient cloud solutions, participating actively in daily stand-ups and sprint reviews.

SKILLS

AWS Core Services – EC2, S3, IAM, VPC, RDS, CloudWatch

Infrastructure as Code – Terraform, CloudFormation

Scripting & Automation – Python, Bash

Operating Systems – Linux Administration

Networking & Security – Network Basics, Cloud Security Best Practices

Methodologies – Agile, Scrum

PROJECTS

Automated AWS Deployment Pipeline

- Engineered an end-to-end CI/CD pipeline using **Jenkins** and **Terraform** to automate the deployment of **Java Spring Boot** applications to **AWS EC2** instances.
- Implemented **Docker containers** for application packaging, ensuring consistent environments across development, testing, and production.
- Integrated automated testing and security scanning into the pipeline, reducing post-deployment defect rates by approximately 30%.

Cloud Operations Monitoring and Alerting

- Developed custom **Python scripts** to parse logs and extract key metrics from **AWS CloudWatch** for enhanced system monitoring.
- Configured and maintained alerting mechanisms using **SNS** and **Lambda** to notify operations teams of critical system events, reducing incident response time by 40%.
- Created dashboards in **CloudWatch** to visualize system health, performance trends, and resource utilization for key applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
