PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Investigated and resolved **production issues** by querying logs and correlating events across services, identifying root causes for a SaaS platform.
- Navigated **Java backend codebases** to trace issues from UI behavior through service logic, implementing targeted code fixes with comprehensive test coverage.
- Developed and maintained **internal tooling**, including log query utilities and diagnostic dashboards, to enhance team efficiency in investigating recurring production problems.
- Crafted clear **post-incident summaries** detailing incident cause, resolution, and preventative measures to reduce future occurrences.
- Authored step-by-step **debugging playbooks** and how-to guides for common production issues, ensuring any engineer could follow the procedures.
- Managed **AWS infrastructure** investigations, reviewing logs, metrics, and environment states to identify contributing factors to production incidents.
- Containerized Java services using **Docker** and deployed them to **AWS EC2** instances, ensuring predictable rollouts and resource management.

SKILLS

Languages – Java, Python, SQL, R, Angular, TypeScript

Frameworks/Libraries – Spring Boot, scikit-learn, pandas, NumPy, Node.js, NestJS

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Observability/Support Tools – Splunk, Dynatrace, Jira, Confluence, PagerDuty

Data Analytics/BI – Power BI, Tableau, DAX, Power Query, RStudio

PROJECTS

Production Incident Triage Tooling (HCL Technologies)

- Developed a **Python CLI tool** to automate log aggregation and initial filtering for common production errors, reducing manual investigation time by an average of **15 minutes per incident**.
- Integrated the tool with **Splunk** to allow direct query execution from the CLI, correlating events across multiple services based on incident timestamps.
- Built a dynamic reporting module that generated summaries of recurring error patterns, aiding the operations team in prioritising bug fixes for the financial-services dashboard.

Java Application Performance Enhancement (HCL Technologies)

- Optimized **Java Spring Boot** REST APIs by refactoring inefficient queries and implementing caching strategies, resulting in a **30% reduction** in average response times for core transaction processing endpoints.
- Enhanced the persistence layer by identifying and resolving N+1 query issues using **Hibernate**, improving database interaction efficiency for critical financial data.
- Implemented **JUnit** and Mockito tests for newly developed API endpoints, ensuring code quality and maintainability within the existing enterprise application.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
