

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for core financial services, handling over **5,000 requests per minute** during peak processing times.
- Developed and maintained **Hibernate** entities and complex JPQL queries for a high-volume transaction processing system, ensuring data integrity across relational databases.
- Engineered **JUnit** and **Mockito** test suites for Java applications, increasing code coverage by **30%** and reducing post-deployment defects.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets.
- Collaborated with business analysts and operations teams to define technical specifications, conduct **UAT**, and support system integrations.
- Contributed to architecture discussions, evaluating trade-offs for adopting new technologies and ensuring adherence to **secure coding principles** and application security best practices.
- Containerized **Java Spring Boot** applications using **Docker** and deployed them to an **AWS EC2** environment, streamlining the deployment process.

SKILLS

Languages – Java, JavaScript, Python, SQL, Bash, Groovy

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD, SonarQube, Artifactory

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Linux

Architecture & Concepts – REST APIs, Event-Driven Architectures, Microservices, Object-Oriented Design, Secure Coding Principles, OWASP, CWE, SEI CERT, TLS, IPsec, PGP, Agile, Scrum, Kanban, SAsE, BDD

PROJECTS

Enterprise Java Application Modernization

- Re-architected a monolithic Java application into a microservices-based system using **Spring Boot** and **Hibernate**, improving system modularity and maintainability.
- Developed asynchronous communication patterns between services using **Kafka**, enabling robust event-driven workflows and enhancing system resilience.
- Implemented comprehensive **unit and integration tests** with JUnit and Mockito, achieving over **85% code coverage** for critical service components.

Financial Transaction Monitoring Service

- Built a **Java Spring Boot** microservice to ingest and process high-volume financial transaction data, integrating with **PostgreSQL** for persistence.
- Designed and implemented RESTful APIs to expose transaction status and operational metrics, supporting downstream reporting and alerting systems.
- Deployed the service to **AWS EC2** instances managed via Jenkins CI/CD pipelines, ensuring automated builds and deployments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
