

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Designed and deployed automated network device lifecycle management systems, reducing manual intervention by **40%** and enabling faster service provisioning.
- Developed **Python** scripts to automate data ingestion and transformation for ML model training pipelines, processing over **5 TB** of network telemetry daily.
- Implemented system design for a distributed control plane, enhancing network reliability and achieving **99.99%** uptime for critical AWS infrastructure services.
- Contributed to the development of **Java Spring Boot** microservices for network monitoring and alerting, successfully resolving over **150** P1/P2 incidents within SLA.
- Managed end-to-end software development lifecycle for network operation tools, including design, testing, deployment, and operation on **AWS**.
- Refactored complex **SQL** queries across PostgreSQL and Oracle databases, optimizing data retrieval for network analytics and reducing query times by an average of **30%**.

SKILLS

Programming Languages – Python, Java, Rust, Go

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases & Data Processing – SQL, PostgreSQL, MySQL, Oracle, Power Query, DAX

Development Tools & Practices – Git, Jenkins, Jira, Confluence, CI/CD, System Design, Agile/Scrum

Networking Concepts – Network Fundamentals, Network Device Lifecycle Management, Control Plane

Machine Learning Operations – ML Network Automation, Data Pipelines, Telemetry Analysis

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

ML-Navigator: Zero Touch Network Automation Platform

- Engineered a scalable, event-driven platform using **Python** and **AWS Lambda** to automate the provisioning and configuration of network devices, achieving a **75%** reduction in deployment time.
- Developed **REST APIs** with **Java Spring Boot** to integrate diverse network management tools, creating a unified interface for operations teams and enabling a **30%** increase in operational efficiency.
- Implemented robust monitoring and alerting mechanisms using **CloudWatch** and **Splunk**, ensuring **99.999%** availability for critical network services and reducing mean time to recovery (MTTR) by **50%**.

Financial Transaction Monitoring Dashboard

- Built and maintained a **Java Spring Boot**-based dashboard for a financial services client, providing real-time transaction monitoring and operational alerting for over **1 million** daily financial messages.
- Automated data validation and reconciliation workflows using **Python** scripting and **SQL** queries across PostgreSQL and Oracle, ensuring data integrity and reducing manual reconciliation efforts by **60%**.
- Managed production support and incident response for the payments operations dashboard, adhering to strict SLAs and maintaining comprehensive audit trails for regulatory compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
