PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Enhanced the availability and reliability of AWS services including **EC2** and **S3** for EU customers, reducing critical incidents by **15%** through proactive monitoring and incident response.
- Developed and tested **Python scripts** for automating operational tasks and data processing, improving workflow efficiency by an estimated **20%**.
- Managed the **change-control process** for production environments, coordinating user acceptance testing (UAT) and post-go-live support for interconnected enterprise systems, ensuring zero service disruptions.
- Reduced analytical report execution times by **34%** across core ERP database clusters by refactoring inefficient **SQL** queries and implementing strategic indexing.
- Contributed to the enhancement of day-to-day operations for a financial-services client's payments operations dashboard, focusing on improvements in availability and latency for **transaction monitoring**.
- Collaborated with technology leaders to influence the evolution of AWS services and technology, contributing to the design of high-availability solutions for **Utility Computing (UC)**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

Business Intelligence – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum, CI/CD, Change Management, Incident Response

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

European Sovereign Cloud (ESC) High-Availability Operations Platform

- Architected and implemented an automated operational health monitoring system for AWS **European Sovereign Cloud (ESC)** services including **Dynamo** and **Lambda**, achieving **99.99%** uptime through real-time anomaly detection and alerting.
- Developed **Python** and **Bash** scripts integrated with **AWS CloudWatch** and **Splunk** for proactive incident identification and automated remediation of common operational issues across a fleet of 500+ **EC2** instances.

- Authored comprehensive operational runbooks and contributed feedback on change management documents, ensuring seamless integration and adherence to strict SLAs for **Utility Computing (UC)** services.

Financial Transaction Monitoring Dashboard Enhancement

- Improved the performance of a **payments operations dashboard** by optimizing **SQL** queries against PostgreSQL, reducing average transaction lookup times by **40%**.
- Implemented new alerting mechanisms within a **Java Spring Boot** application to flag failed payment messages, contributing to a **25%** reduction in manual reconciliation efforts.
- Collaborated with business analysts to refine **transaction monitoring** workflows and ensure adherence to regulatory awareness for sensitive financial data.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
