PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and executed test solutions for high-performance mixed-signal **ATE platforms**, achieving a **15% reduction** in test cycle time for new product introductions.
- Designed and implemented **DFT (Design for Testability)** strategies, enhancing product quality and reducing manufacturing costs by an average of **10%** across multiple product lines.
- Performed pre-tapeout verification of test solutions using **Design Simulation tools**, identifying and resolving critical bugs that prevented an estimated **\$500K** in potential yield loss.
- Supported the fast ramp of ultra high-volume new products by refining test methodologies and collaborating with offshore production teams, contributing to a **20% increase** in throughput.
- Drove continuous advancement of measurement methodologies by improving test routines and analysis techniques, resulting in a **5% uplift** in silicon functionality yield.
- Debugged and analyzed silicon functionality and characterization data, optimizing test solutions and supporting offshore production release with a **98% success rate** on initial deployments.

SKILLS

Test Development – DFT, Test Solutions, Silicon Functionality, Characterization, Yield Analysis, Production Release.

Software Development – Python, Java, C, Visual Basic.

Hardware Platforms – ATE Platforms, Mixed-Signal.

Tools & Methodologies – Design Simulation Tools, Jenkins, Git, Jira.

Data Analysis & Reporting – Data Modelling, Statistical Analysis, Power BI, DAX, Power Query.

Cloud & Infrastructure – AWS, Docker, Linux.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Automated Mixed-Signal Test Platform for High-Volume Consumer Electronics

- Architected and developed an automated test solution for a new generation of consumer sensing integrated circuits, targeting **millions of units** annually.
- Implemented advanced **DFT** strategies and utilized **Python** scripting to optimize test coverage, reducing test time by **22%** while maintaining **99.5%** defect detection.

- Designed and integrated multi-site test routines on a high-performance **ATE platform**, enabling parallel testing and achieving a **30% improvement** in overall test station throughput.

Real-Time Transaction Monitoring Dashboard (HCL Technologies)

- Developed and maintained a **Java Spring Boot**-based dashboard for real-time transaction monitoring of financial services operations, supporting critical business workflows.
- Integrated **Splunk** for log aggregation and alerting, reducing mean time to detect (MTTD) for critical payment processing issues by **40%**.
- Automated data validation and reconciliation checks using **Python** and **SQL** queries against **PostgreSQL** databases, ensuring data integrity for over **100,000** daily transactions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
