PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed robust APIs with **Java Spring Boot** and **REST**, enabling sustainability analysis for Autodesk customers, processing over 10,000 daily requests with 99.9% uptime.
- Contributed to real commercial development projects using **TypeScript**, adhering to Agile and Scrum practices, and delivering features 15% ahead of schedule.
- Integrated environmental data through a unified, standardized interface using **AWS Lambda** and **API Gateway**, supporting real-time data ingestion for over 5,000 connected devices.
- Applied automated testing frameworks, including **JUnit** and **Mockito**, to build reliable and maintainable code, reducing critical bug reports by **40%** post-deployment.
- Managed source control and Continuous Integration platforms like **GitHub** and **Jenkins**, automating build and deployment pipelines to accelerate the software development lifecycle.
- Collaborated with cross-functional teams to understand and implement requirements across the full software development lifecycle, participating in daily stand-ups and sprint reviews.

SKILLS

Languages – TypeScript, Java, Python, SQL, R.

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, API Gateway), Docker.

Backend Development – Spring Boot, REST APIs, GraphQL, Node.js.

DevOps & CI/CD – GitHub, Jenkins, Git, Automated Testing Frameworks.

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, R.

Databases – PostgreSQL, MySQL, Oracle.

Methodologies – Agile, Scrum.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Environmental Data Aggregation & Analysis Platform (Autodesk Summer Internship Project)

- Architected and developed a cloud-native backend service using **TypeScript** and **NestJS** on **AWS**, designed to ingest, process, and expose environmental sensor data through a standardized **GraphQL API**.
- Implemented a real-time data processing pipeline leveraging **AWS Lambda** and **Kinesis**, achieving a data ingestion throughput of 50,000 events per second and reducing data latency by **60%**.

- Integrated automated testing, including unit and integration tests with **Jest**, and established CI/CD pipelines via **GitHub Actions** and **Jenkins**, ensuring 99.95% test coverage and enabling bi-weekly production deployments.
- Developed interactive dashboards in **Power BI** to visualize aggregated environmental metrics, providing actionable insights to stakeholders and supporting sustainability analysis for Autodesk's manufacturing clients.

Payments Operations Dashboard Enhancement (HCL Technologies)

- Enhanced the transaction monitoring module of a financial-services dashboard using **Java Spring Boot**, improving the detection rate of failed payment messages by **25%** through refined alerting logic.
- Automated data validation checks for reconciliation workflows using **Python** scripts, reducing manual effort by 10 hours per week and enhancing data integrity across critical financial operations.
- Optimized SQL queries against a large PostgreSQL database, decreasing report generation times for transaction analysis by an average of **30%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
