PROJECTS

BioRender Data Analysis Product Support Playbook (HCL Technologies)

- Architected and documented a comprehensive support playbook for BioRender's data analysis product, mapping common user inquiries to step-by-step resolution guides and best practices.

- Developed 30+ detailed knowledge base articles covering statistical concepts, visualization techniques, and product-specific features, leading to a **25%** reduction in repeat inquiries for common issues.
- Integrated user feedback loops with Product and Engineering teams, establishing a structured process for triaging, prioritizing, and tracking bug reports and feature requests, directly influencing the Q3 product roadmap.

Financial Services Transaction Monitoring Dashboard (HCL Technologies)

- Enhanced production support for a financial-services operations dashboard by implementing real-time alerting for failed transaction messages, reducing critical incident response time by **30%**.
- Automated data validation checks using Python scripts across PostgreSQL and Oracle databases, improving data integrity for reconciliation workflows and decreasing manual error rates by **15%**.
- Contributed to the development of new features for transaction monitoring, ensuring adherence to strict SLAs and audit trail requirements within a regulated production environment.
