PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and executed comprehensive test plans and test cases for new software features, resulting in a **15% reduction** in post-deployment critical defects.
- Implemented automated testing scripts using **Python** to validate API integrations and data flows, improving test execution efficiency by **40%**.
- Collaborated with cross-functional teams to define quality standards and ensure compliance with regulatory requirements, maintaining **100% adherence** to internal quality policies.
- Managed defect tracking and resolution lifecycles using **Jira**, facilitating clear communication and efficient bug fixing with development teams to achieve a **98% resolution rate** within SLA.
- Performed root cause analysis for production issues encountered in enterprise systems, contributing to the implementation of corrective actions that reduced system downtime by **10%**.
- Contributed to the validation of enterprise business systems, including ERP modules, by coordinating User Acceptance Testing (UAT) and documenting outcomes, ensuring successful system configuration updates.

SKILLS

Quality Engineering – Software Qualification, Validation Practices, Test Planning, Test Case Development, Defect Management, Root Cause Analysis, UAT Coordination

Programming Languages – Python, Java, SQL, C#

Development Tools & Platforms – AWS, Docker, Linux, Jenkins, Git, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

Business Systems – ERP Systems Support, Enterprise Application Integration, Change Control Management

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Methodologies – Agile, Scrum, Regulatory Compliance, Data Integrity

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Automated Software Validation Framework for Medical Devices

- Designed and implemented an automated testing framework using **Python** and **Selenium** to accelerate the validation of embedded software for medical devices, reducing manual testing effort by **60%**.
- Integrated the framework with **Jenkins** CI/CD pipelines to enable continuous integration and automated regression testing, ensuring compliance with stringent quality and regulatory standards (e.g., FDA 21 CFR Part 11).

- Developed comprehensive test suites covering functional, performance, and security aspects, achieving a **95% test coverage** for critical software modules and identifying over **200 defects** prior to release.

Financial Operations Dashboard Enhancement

- Enhanced a payments operations dashboard for a financial services client by developing new **Java Spring Boot** microservices to process and monitor transaction flows, improving real-time alert accuracy by **25%**.
- Automated data reconciliation workflows using **Python** scripting, reducing manual reconciliation time by **30%** and ensuring data integrity across multiple financial systems.
- Supported the production environment by implementing enhanced monitoring using **Splunk** and **Dynatrace**, contributing to a **99.9%** system uptime and faster incident response times.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
