PROJECTS

Real-Time Fraud Prevention Feature Pipeline

- Developed a **Python**-based feature pipeline for a financial services client to detect fraudulent credit card transactions in real-time, processing **10,000+** transactions per second.
- Integrated custom feature extraction logic using **SQL** queries against a **PostgreSQL** data warehouse, improving the accuracy of fraud detection models by **18%**.

- Implemented robust error handling and monitoring using **AWS CloudWatch** and **Splunk**, ensuring **99.95%** uptime and providing immediate alerts for pipeline anomalies.

Payments Operations Dashboard Enhancements

- Enhanced a **Java Spring Boot**-based payments operations dashboard by implementing new transaction monitoring alerts, reducing critical payment message failures by **25%**.
- Developed **Python** scripts to automate data reconciliation workflows between core banking systems and the dashboard, saving an estimated **15 hours** of manual work per week.
- Supported production deployments and managed incident response for the financial-services dashboard, maintaining strict audit trails and ensuring compliance with GDPR regulations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
