PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python applications** and data pipelines, ensuring **99.8% uptime** for batch processing jobs using **Pandas** and **NumPy** for data transformation and validation.
- Supported **PySpark** data processing initiatives for large-scale datasets, contributing to the optimization of data flow efficiency by **15%** under senior engineer guidance.
- Wrote and documented clean, efficient **Python code** for batch and data-processing jobs, reducing bug-fix time by **20%** through adherence to best practices.
- Participated in rigorous **code reviews** and applied best practices in performance and data handling, improving code quality metrics by **10%**.
- Debugged and resolved issues in complex batch and data-processing jobs, decreasing critical incident occurrences by **25%**.
- Collaborated effectively with cross-functional teams including **data engineers**, QA, and DevOps to ensure seamless integration and deployment of new features, accelerating release cycles by **12%**.

SKILLS

Programming Languages – Python, PySpark, Java, SQL

Data Processing & Libraries – Pandas, NumPy, Scikit-learn, R

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jira, Confluence, Splunk, Dynatrace

Frameworks – Spring Boot, Flask, FastAPI

Data Visualization – Power BI, Tableau

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Real-Time Transaction Anomaly Detection System

- Engineered a Python-based system to process and analyze high-volume transaction data streams, identifying anomalies in real-time with **98% accuracy**.
- Developed data pipelines using **Pandas** and **NumPy** for cleaning and transforming raw transaction logs, reducing data preparation time by **30%**.

- Integrated the system with **PostgreSQL** for persistent storage of processed data and detected anomalies, ensuring data integrity and enabling historical analysis for **millions of transactions** daily.
- Implemented robust error handling and logging mechanisms using **Splunk**, decreasing mean time to detect (MTTD) for system failures by **40%**.

Financial Services Operations Dashboard Enhancement

- Contributed to the development and maintenance of a **payments operations dashboard**, focusing on transaction monitoring and operational alerting for financial services client.
- Automated data validation checks using **Python scripting**, improving the accuracy of reconciliation workflows and reducing manual effort by **25%**.
- Supported production environments with strict SLAs and audit trails, ensuring compliance with GDPR awareness and enhancing overall system reliability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
