PROJECTS

Enterprise Operational IP Standardization Platform (HCL Technologies)

- Engineered a comprehensive system for capturing and documenting institutional knowledge, translating complex **enterprise business processes** into structured workflows using **Java Spring Boot** and **PostgreSQL**.
- Automated the generation of real-time operational data reports on process execution, enabling clients to measure productivity and efficiency, achieving a **25%** improvement in process throughput.
- Developed robust alerting mechanisms for identifying deviations from documented workflows, reducing critical process exceptions by **35%** and enhancing overall operational consistency.

Financial Services Transaction Monitoring Dashboard (HCL Technologies)

- Supported and enhanced a **payments operations dashboard** for a financial-services client, focusing on transaction-flow monitoring and operational alerting for failed payment messages.
- Implemented data validation checks and reconciliation workflows within a **Java Spring Boot** application, ensuring data integrity and reducing reconciliation discrepancies by **18%**.
- Managed production support and incident response for the dashboard in a high-availability environment with strict SLAs, maintaining a **99.95%** uptime.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
