PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented core backend systems for dynamic content resolution, improving content delivery speed by **30%** through optimized API schemas and versioning strategies.
- Developed deterministic, cache-aware execution pipelines using **Java Spring Boot** and AWS Lambda, ensuring strong performance guarantees for mission-critical services processing millions of requests daily.
- Owned the operational reliability of production systems, including implementing comprehensive monitoring and debugging solutions with **Splunk** and **CloudWatch**, achieving **99.95%** uptime.
- Evolved APIs and data models for complex, long-lived production systems, facilitating seamless integration for internal teams and external customers, reducing integration time by **20%**.
- Automated data transformation pipelines and reporting processes using **Python** scripting and SQL across PostgreSQL and Oracle, reducing manual effort by **40%** and enhancing data accuracy.
- Contributed to enterprise business system integrations via REST APIs and database-level data flows, supporting change-control management and ensuring smooth post-go-live operations for interconnected platforms.

SKILLS

Backend Development – Java Spring Boot, Python, REST APIs, System Design, Performance Optimization, Maintainability

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Terraform

Data Management – SQL (PostgreSQL, MySQL, Oracle), Data Warehousing, Data Modelling, ETL

Observability & Support – Splunk, Dynatrace, Incident Response, SLA Management, Debugging

API & Schema Design – API Evolution, Schema Versioning, GraphQL (familiarity), Declarative Systems

Content Management & AI – Digital Experience Platforms, AI Capabilities (familiarity), Content Modelling

Programming & Scripting – Python, Java, R, TypeScript (familiarity)

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Event-Sourced Content Delivery Mesh

- Architected and deployed an event-sourced backend system using **Java Spring Boot**, **PostgreSQL**, and **AWS Lambda** to manage dynamic content resolution and delivery for a high-traffic digital experience platform.
- Implemented deterministic, cache-aware execution pipelines, processing over **1 billion requests per month** with sub-200ms latency by integrating with **Cloudflare** and utilizing robust caching strategies.

- Defined and evolved RESTful APIs and content schemas with long-term stability, supporting billions of monthly requests and enabling seamless integration with diverse front-end applications and personalization engines.

Financial Services Transaction Monitoring Dashboard

- Developed and maintained production support for a financial-services operations dashboard, focusing on transaction-flow monitoring and operational alerting for payment messages using **Java Spring Boot** and **Python**.
- Implemented robust audit trails and automated reconciliation workflows, ensuring compliance with regulatory awareness and GDPR requirements within a strict SLA environment.
- Supported cross-functional collaboration with operations teams and business analysts to gather requirements, manage change control, and provide post-implementation triage for critical payment processing systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
