PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Resolved 95% of critical production incidents within SLA by implementing proactive monitoring using **Splunk** and **Dynatrace**, ensuring 99.9% application uptime for enterprise systems.
- Automated key operational tasks and data extraction processes using **Python** scripting, reducing manual effort by **40%** and improving data pipeline efficiency.
- Managed and resolved over **500** P1/P2 incidents across Java/.NET applications, coordinating cross-functional teams to minimize downtime and restore services within defined SLAs.
- Executed complex SQL queries and schema modifications across **PostgreSQL**, **MySQL**, and **Oracle** databases to support data validation, reporting, and system integrations, impacting **3** core business systems.
- Developed and enhanced REST APIs using **Java Spring Boot** for a financial-services operations dashboard, supporting real-time transaction monitoring and reconciliation workflows.
- Facilitated change management processes for enterprise business systems, coordinating UAT and post-go-live support to ensure smooth system configuration updates and integrations across interconnected platforms.

PROJECTS

Enterprise System Health and Performance Monitoring Dashboard (HCL Technologies)

- Developed a comprehensive **dashboard** using **Power BI** to visualize the health and performance metrics of critical enterprise systems, integrating data from **Splunk** and **Dynatrace**.

- Created complex **DAX measures** and data models to provide real-time insights into application uptime, incident response times, and resource utilization, enabling proactive issue resolution and reducing system downtime by **15%**.
- Automated ETL processes using **Power Query** for data ingestion and transformation, ensuring data accuracy and timely report generation for operational stakeholders and management.

Automated IT Asset Discovery and Inventory System

- Engineered a Python-based application to automatically discover and inventory IT assets across a dispersed network environment, identifying over **1,000** previously unmanaged devices.
- Integrated with **Active Directory** and network scanning tools to collect detailed hardware and software configurations, enhancing security posture and simplifying compliance reporting.
- Implemented REST API endpoints for seamless integration with existing IT Service Management (ITSM) tools, streamlining asset lifecycle management and reducing manual data entry by **60%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
