PROJECTS

Automated LIMS Data Integration and Reporting Platform

- Developed a Python-based automation script to ingest and validate external sample results from multiple client formats directly into the client's **LIMS**, reducing manual data entry time by **40%**.
- Designed and implemented a **Power BI** dashboard to visualize key quality and business metrics, including sample turnaround times, critical result flags, and batch completion rates, providing real-time operational insights to laboratory management.
- Integrated automated report generation for environmental monitoring and water analysis into the platform, delivering comprehensive reports weekly and improving data accuracy by **98%** through automated validation checks.

Financial Services Operations Dashboard Enhancement

- Enhanced a payments operations dashboard by building new modules for **transaction monitoring** and **reconciliation workflows** using Java Spring Boot and PostgreSQL, processing over 1 million transactions daily.
- Implemented real-time alerting for failed or stuck payment messages, reducing critical incident response times by **30%** and improving overall system uptime to **99.95%**.
- Collaborated with business analysts to gather requirements for operational alerting and retrospective analysis, ensuring adherence to **GDPR** and other regulatory awareness within the production environment.
