

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **AI/LLM-powered backend systems** and APIs for scalable, real-world use cases, processing over 10,000 requests per minute during peak loads.
- Architected and optimised **data pipelines** using Python and SQL, reducing data ingestion latency by **40%** to support intelligent applications.
- Managed and scaled distributed systems within **AWS cloud environments** (EC2, Lambda, S3), ensuring 99.95% uptime for critical AI services.
- Developed and maintained **production-grade AI systems**, integrating with existing platforms and improving model inference speed by **25%**.
- Collaborated across engineering and product teams to embed **AI solutions** into core workflows, directly contributing to a **15%** increase in operational efficiency.
- Monitored, evaluated, and continuously improved **system performance** in production using Splunk and CloudWatch, resolving P1 incidents within a 30-minute SLA.

SKILLS

AI/ML Engineering – LLMs, AI Systems Design, Model Deployment, MLOps, Python, LangChain

Backend Development – Python, Flask, FastAPI, REST APIs, Java, Spring Boot, Microservices

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Engineering & Analytics – SQL (PostgreSQL, MySQL, Oracle), Data Pipelines, ETL, Power BI, DAX, Data Warehousing

System Architecture – Distributed Systems, API Design, Data Architecture, Scalability, Performance Optimisation

Observability & Support – Splunk, Dynatrace, Incident Response, SLA Management, Change Management

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Anomaly Detection System for Financial Transactions

- Engineered a **Python-based backend system** leveraging FastAPI and PostgreSQL to process and analyze streaming financial transaction data, identifying anomalies in real-time.
- Designed and implemented robust **data pipelines** for ingesting and transforming high-volume transaction logs, achieving a data processing throughput of **500,000 records per hour**.

- Deployed the system on **AWS EC2 instances** managed via Jenkins CI/CD pipelines, ensuring high availability and seamless integration with existing financial services platforms.

Interactive Executive KPI Dashboard (Power BI)

- Developed an interactive **Power BI dashboard** visualising key performance indicators for executive stakeholders, consolidating data from multiple enterprise systems.
- Created complex **DAX measures** and Power Query transformations to model data and provide actionable insights, reducing ad-hoc reporting time by **30%**.
- Published and managed report access on the Power BI service, ensuring timely delivery of critical business intelligence to leadership.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
