PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained scalable, secure Python applications, resolving **150+ critical defects** and improving system reliability by **20%** through rigorous testing and code reviews.
- Designed and implemented serverless Python solutions on **AWS Lambda** and **API Gateway**, contributing to system architecture decisions for a cloud-based environment and reducing operational costs by **18%**.
- Automated data validation and ETL processes using **Python scripting**, processing over **500,000 records daily** and ensuring data integrity for financial reporting dashboards.
- Collaborated with cross-functional teams to integrate software solutions, implementing **REST APIs** that facilitated seamless data exchange between enterprise business systems and a payments operations dashboard.
- Enhanced the performance of a financial-services operations dashboard by optimizing **SQL queries** across **PostgreSQL** and **Oracle databases**, reducing report generation time by **30%**.
- Managed application stability and SLA adherence for production systems, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**, achieving **99.95% uptime**.

SKILLS

Programming Languages – Python, Java, JavaScript, TypeScript, SQL, R

Cloud Platforms – AWS (Lambda, API Gateway, DynamoDB, S3, EC2, CloudWatch), Docker

Databases – PostgreSQL, MySQL, Oracle, DynamoDB, NoSQL

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile/Scrum, CI/CD, Infrastructure-as-Code (Terraform/CloudFormation concepts)

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn

Software Engineering – Object-Oriented Design, Clean Code Principles, Software Testing, Software Development, System Design, Incident Management, Production Support

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Serverless Python Data Processing Pipeline for Real-Time Analytics

- Architected and deployed a serverless data pipeline using **Python** on **AWS Lambda** and **API Gateway** to ingest and process streaming financial transaction data, handling over **1 million events per day**.
- Integrated with **DynamoDB** for persistent storage of processed transaction records, enabling real-time querying and analysis for operational dashboards, reducing data latency by **60%**.

- Implemented comprehensive logging and monitoring with **AWS CloudWatch**, ensuring **99.99% availability** and facilitating rapid troubleshooting of data flow anomalies.
- Developed unit and integration tests for all pipeline components, achieving **90% code coverage** and ensuring the reliability and scalability of the data processing solution.

Payments Operations Dashboard Enhancement

- Developed new features and performed production support for a payments operations dashboard, monitoring transaction flows and implementing alerting for failed payment messages, directly supporting a financial-services client.
- Optimized **SQL queries** across **PostgreSQL** and **MySQL** databases, improving the performance of reconciliation workflows and transaction monitoring functionalities by **25%**.
- Collaborated with business analysts to gather requirements and support User Acceptance Testing (UAT) for system configuration updates, ensuring adherence to regulatory and GDPR awareness standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
