PROJECTS

Global Financial Crime Risk Monitoring Platform

- Developed a comprehensive platform for enhanced due diligence (EDD) and financial crime risk monitoring, integrating **Python** scripts for data ingestion and analysis from diverse internal and external sources.
- Implemented advanced analytical models using **SQL** across **PostgreSQL** and **Oracle** databases to identify suspicious transaction patterns and assess risks related to fraud, AML/CFT, and sanctions exposure, achieving a **96%** detection accuracy rate.
- Engineered robust reporting dashboards in **Power BI** to visualize key risk indicators and investigative findings, facilitating clear, comprehensive documentation for **audit requirements** and defensible decision-making, reducing reporting time by **40%**.

Payments Operations Dashboard Enhancement

- Supported and enhanced a **payments operations dashboard** for a financial-services client, focusing on transaction-flow monitoring and operational alerting for failed payment messages.
- Automated data validation and reconciliation workflows using **Python** and **SQL**, improving the accuracy of transaction status reporting by **25%** and reducing manual effort.
- Managed change control processes for system configuration updates and coordinated User Acceptance Testing (UAT) for new feature rollouts, ensuring seamless integration with existing enterprise business systems.
