

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java Spring Boot microservices**, contributing to a distributed network modelling platform, improving data processing throughput by **30%**.
- Authored **Python scripts** to automate data ingestion and transformation pipelines, reducing manual processing time for large datasets by **50%**.
- Managed and resolved critical production incidents across enterprise applications, achieving a **99.95%** service level agreement adherence for system uptime.
- Designed and implemented **SQL queries and database schema modifications** in PostgreSQL, supporting complex distributed system data requirements and enhancing query performance by **20%**.
- Contributed to the design and implementation of **CI/CD pipelines using Jenkins**, automating build, test, and deployment processes for distributed network modelling components, reducing deployment cycles by **40%**.
- Analyzed and debugged complex system issues within a **Linux environment**, correlating logs from **Splunk and Dynatrace** to identify root causes and implement effective resolutions, minimizing downtime.

SKILLS

Programming Languages – Java, Python, C++, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Jenkins, Git

Observability & Monitoring – Splunk, Dynatrace

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Distributed Network Simulation Engine (HCL Technologies)

- Engineered a high-performance simulation engine using **Java Spring Boot** and **PostgreSQL** to model complex distributed network traffic patterns, processing over **1 million simulated events per second**.
- Developed **Python-based data processing modules** to ingest real-world network telemetry, transforming raw data into actionable insights for model calibration and achieving a **95% data accuracy rate**.

- Integrated **Docker containers** into the deployment strategy for simulation nodes, enabling scalable and consistent execution across diverse environments and reducing setup time by **70%**.

Real-time Payments Transaction Monitoring Dashboard (HCL Technologies)

- Developed and maintained a **Java Spring Boot**-based application that monitored high-volume financial transactions, identifying and alerting on anomalies in **near real-time** to ensure operational integrity.
- Implemented robust **SQL queries** against a **PostgreSQL** database to track transaction flows and support reconciliation workflows, improving the detection of processing errors by **25%**.
- Collaborated with business analysts to refine alerting logic and operational dashboards using **Splunk**, ensuring compliance with regulatory audit trail requirements and reducing false positive alerts by **15%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
