PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **robust, scalable software systems** for distributed networking solutions, ensuring production code resilience and maintainability with **99.95% uptime**.
- Automated **network configuration deployments** using Python scripts, reducing manual intervention by **40%** and accelerating rollout timelines.
- Managed and prioritized **project work** in a self-directed manner, contributing to the successful migration of legacy routing paradigms to a modern, distributed architecture.
- Contributed to **qualification, documentation, and production monitoring**, driving high standards and improving code maintainability by **15%** through diligent code reviews.
- Collaborated with cross-functional teams to align **project timelines** and technical problem-solving across multiple areas of the distributed network stack.
- Abstracted complex **networking hardware** into manageable, evolvable services, enhancing system flexibility and reducing integration complexity by **20%**.

SKILLS

Core Development – Go, Python, Java, Spring Boot, REST APIs, Microservices

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Networking & Systems – Software Defined Networking (SDN), Distributed Systems, Linux, Shell Scripting, Router/Switch Telemetry

Data & Observability – SQL (PostgreSQL, MySQL, Oracle), Splunk, Dynatrace, Data Warehousing

DevOps & CI/CD – Jenkins, Git, Jira, Confluence, Agile/Scrum

Data Analytics & BI – Power BI, Tableau, DAX, R, pandas, NumPy

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Distributed SDN Controller Platform

- Developed a **highly available distributed controller** for Software Defined Networks, managing a fleet of over **10,000 network devices**.
- Implemented **router/switch telemetry** collection and processing pipelines using Go and gRPC, achieving sub-second latency for critical network state updates.

- Integrated **containerised network functions** (CNFs) via Kubernetes, enabling dynamic service deployment and reducing network provisioning time by **60%**.
- Designed and implemented **REST APIs** for network configuration management, facilitating seamless integration with orchestration tools and improving system interoperability.

Automated Payments Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** by developing Python scripts for automated transaction monitoring and alerting on failed payment messages, reducing manual oversight by **35%**.
- Optimized SQL queries across PostgreSQL and Oracle databases to improve the performance of **reconciliation workflows** by **25%**, ensuring data accuracy for financial reporting.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
