PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Developed and deployed new features for a large-scale network technology platform, contributing to the efficient operation of Google's Wide Area Network at unprecedented scale.
- Reviewed code from peers and stakeholders, ensuring adherence to best practices in style, accuracy, and testability, which improved overall code quality by an estimated **15%**.
- Triageed and resolved critical system issues by analyzing root causes impacting hardware, network, and service operations, reducing incident resolution time by **20%**.
- Authored and updated technical documentation and educational content for internal teams, adapting materials based on product updates and user feedback to enhance knowledge sharing.
- Participated in design reviews with cross-functional teams to evaluate and select optimal technologies for new product development, ensuring alignment with strategic goals.
- Engineered Python scripts to automate data processing and ETL tasks for network performance analytics, reducing manual effort by **40%** and improving data pipeline efficiency.

SKILLS

Backend Development – Java, Spring Boot, Python, Go, C++, REST APIs, SQL, PostgreSQL, MySQL, Oracle

Frontend Development – Angular, TypeScript, JavaScript, HTML, CSS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Shell Scripting

DevOps & CI/CD – Jenkins, Git, Code Reviews

Data Analytics & BI – Power BI, DAX, Tableau, R, pandas, NumPy, scikit-learn, Data Warehousing

System Operations & Monitoring – Splunk, Dynatrace, Incident Response, Change Management, Jira, Confluence

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Global Network Performance Analytics Platform (HCL Technologies)

- Designed and implemented a comprehensive system for monitoring and analyzing global network traffic patterns, processing over **10 terabytes** of data daily.
- Developed real-time dashboards using **Power BI** and custom Python visualizations to provide stakeholders with actionable insights into network latency and throughput, reducing critical incident detection time by **30%**.

- Engineered automated data pipelines with **Python** and **SQL** to ingest, transform, and load network telemetry data from diverse sources into a centralized data warehouse, achieving **99.9%** data accuracy.
- Integrated the platform with existing enterprise systems via **REST APIs**, facilitating seamless data flow for cross-functional analysis and reporting.

Financial Services Transaction Monitoring Dashboard (HCL Technologies)

- Supported production operations for a financial services client's transaction monitoring dashboard, focusing on **transaction-flow monitoring** and alerting for failed payment messages.
- Managed and resolved P1/P2 incidents within strict SLAs, ensuring high availability for critical operational dashboards and maintaining **audit trail** integrity.
- Collaborated with business analysts to refine requirements for operational alerting and reporting features, enhancing the platform's ability to support **regulatory** and GDPR-aware production environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
