PROJECTS

Holafly Customer Acquisition & Retention Analytics Platform (MSc Project)

- Engineered a comprehensive analytics platform using **Power BI** to visualize customer acquisition costs (**CAC**), lifetime value (**LTV**), and return on ad spend (**ROAS**) across multiple marketing channels.
- Developed complex **DAX measures** and Power Query transformations to integrate data from Google Ads, Meta Ads, and GA4, enabling granular tracking of campaign performance and conversion funnels.
- Implemented customer segmentation models based on **RFM analysis** and churn prediction using Python (pandas, scikit-learn), providing actionable insights for personalized marketing automation campaigns that boosted customer retention by **8%**.

Financial Services Payments Dashboard Enhancements (HCL Technologies)

- Enhanced a production payments operations dashboard by developing **Java Spring Boot** microservices and **Python** scripts to automate transaction monitoring and operational alerting for failed payment messages.
- Optimized **SQL queries** against PostgreSQL and Oracle databases, improving the performance of reconciliation workflows and reducing data retrieval times by **20%**.
- Managed change control processes and supported UAT for system configuration updates, ensuring seamless integration of new features within the regulatory-aware production environment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
