PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Resolved an average of **15+ complex customer integration issues** per week by debugging API interactions and system behavior, achieving a **95% first-contact resolution rate**.
- Reduced customer onboarding time by **20%** by developing **Python scripts** for automated data validation and setup tasks, integrating directly with the platform's APIs.
- Triaged and resolved **100% of P1/P2 escalations** within defined SLAs by analyzing system logs using **Splunk** and **Dynatrace**, ensuring minimal disruption to customer operations.
- Enhanced product usability by identifying **5-10 recurring customer issues** weekly and providing structured feedback to engineering teams, leading to targeted roadmap improvements.
- Automated **3 critical support workflows** using **Python** and **SQL**, reducing manual processing time by **40%** and improving operational efficiency for the support organization.
- Developed and maintained **20+ technical documentation articles** and knowledge base entries for complex API integrations, improving customer self-service success by **30%**.

SKILLS

Core Technologies – Python, SQL, Java, Spring Boot, REST APIs, Docker, Linux, Git

Cloud & Observability – AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace

SaaS & Support Tools – Zendesk, Front, Pylon, Jira, Confluence

Data & Analytics – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy

System Integration – API-driven systems, ERP integration, Database integrations (PostgreSQL, MySQL, Oracle)

Scripting & Automation – Python scripting, Shell scripting, CI/CD (Jenkins)

Customer Interaction – Technical support, Customer-facing engineering, B2B SaaS support, Knowledge base creation

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Automated Usage-Based Billing Integration Platform

- Engineered an automated platform to streamline customer integration with a usage-based billing system, processing **100,000+ transactions daily** with **99.95% accuracy**.
- Developed **Python-based microservices** to manage API interactions, data transformation, and webhook event handling, reducing manual integration effort by **60%**.

- Implemented comprehensive logging and monitoring using **AWS CloudWatch** and integrated with **Splunk** for real-time issue detection, decreasing average issue resolution time by **25%**.

Financial Services Transaction Monitoring Dashboard

- Developed a **Java Spring Boot**-powered dashboard for a financial services client to monitor transaction flows and operational alerts, ensuring adherence to strict SLAs.
- Integrated **PostgreSQL** for storing transaction data and utilized **Python** for ETL processes, supporting reconciliation workflows and providing audit trails for regulatory awareness.
- Collaborated with business analysts to define requirements for transaction monitoring and implemented alerting mechanisms for failed payment messages, improving operational oversight.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
