PROJECTS

Enterprise IT Asset Management & Support Platform (HCL Technologies)

- Developed a Python-based **IT Asset Management (ITAM)** system to track hardware and software inventory across 500+ devices, reducing asset loss by **18%** and improving audit compliance.
- Integrated the ITAM system with **Jira** workflows for automated ticket generation upon device onboarding and decommissioning, streamlining support operations and decreasing manual entry by **40%**.
- Designed and implemented REST APIs using **FastAPI** to allow real-time status updates from end-user devices, enhancing proactive issue detection and enabling faster resolution of common IT issues.

Payments Operations Dashboard Enhancement (HCL Technologies)

- Contributed to the enhancement of a **payments operations dashboard** by developing new monitoring modules in **Java Spring Boot**, improving visibility into transaction flows and reducing manual reconciliation efforts by **25%**.
- Automated the generation of daily operational reports using **Python** and **SQL** queries against PostgreSQL, delivering critical insights on failed payment messages and reducing report generation time from 4 hours to 30 minutes.
- Supported production environments with strict SLAs, implementing enhanced alerting mechanisms via **Splunk** that decreased P1/P2 incident response times by **10%**.
