PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java 11 Spring Boot microservices** on **AWS**, contributing to a **15% reduction** in transaction processing latency for a financial services platform.
- Engineered **event-driven asynchronous messaging** solutions using **Kafka** and **JMS**, achieving a **99.95%** message delivery success rate for critical trade processing workflows.
- Designed and implemented **relational database schemas** and optimized complex queries across **PostgreSQL** and **Oracle**, improving data retrieval performance by **20%** for regulatory reporting.
- Automated **CI/CD pipelines** with **Jenkins** and **Git**, reducing deployment times by **30%** and enabling seamless integration of new features into production environments.
- Analyzed large, diverse datasets from financial systems, identifying systemic issues in code and architecture that led to a **10% decrease** in production incidents through root cause analysis and targeted remediation.
- Contributed to a **cross-functional agile team** focused on enhancing trade processing platform stability, delivering secure, high-quality production code and participating actively in code reviews and technical design discussions.

SKILLS

Core Java & Spring – Java 11, Spring Boot, Microservices, REST APIs, Java Messaging System (JMS)

Databases – PostgreSQL, Oracle, MongoDB, SQL, Database Design, Query Optimization

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, Application Resiliency, Security

Messaging & Event-Driven – Kafka, Event-Driven Architecture

Data Analysis & BI – Data Visualization, Reporting, Power BI, Tableau, DAX, R, Python (Pandas, NumPy)

Financial Domain – Trade Processing, Financial Services Industry IT Systems, Regulatory Compliance

Methodologies – Agile, Scrum, Software Development Life Cycle (SDLC)

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Investment Banking Trade Processing Platform Enhancement (HCL Technologies)

- Architected and developed a **Java 11 Spring Boot-based microservice** for real-time trade settlement validation, processing over **1 million transactions daily** with sub-second latency.
- Integrated asynchronous communication patterns using **Kafka** to decouple trade capture from settlement services, increasing system throughput by **25%** and enhancing fault tolerance.

- Implemented automated **CI/CD pipelines** using **Jenkins** and **Docker**, enabling daily deployments and reducing the mean time to recovery (MTTR) for critical issues by **40%**.

Financial Services Transaction Monitoring Dashboard

- Developed a **payments operations dashboard** using **Python** and **SQL** to monitor transaction flows and provide operational alerting for failed payment messages, supporting a major financial services client.
- Integrated with production systems to capture real-time metrics, enabling **99.9% uptime** for critical financial operations and supporting audit trail requirements.
- Collaborated with business analysts to gather requirements for new monitoring features, facilitating faster triage and resolution of production issues within strict SLAs.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
