PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reduced production incident resolution time by **18%** by developing **automated diagnostic scripts** in Python, integrating with **Splunk** for log aggregation and analysis.
- Enhanced system reliability for a financial-services operations dashboard by implementing **proactive monitoring alerts** using **Dynatrace**, decreasing P1/P2 incidents by **22%**.
- Optimized **Java Spring Boot** microservices by refactoring REST API endpoints and resolving critical bugs, improving average response times by **15%** and supporting a **30%** increase in transaction volume.
- Automated database validation checks and schema migration processes using **SQL (PostgreSQL, Oracle)** and **Python**, cutting manual review time by **40%** and ensuring data integrity across enterprise systems.
- Managed change control processes for **ERP** system configurations and integrations, coordinating UAT and post-go-live support to ensure seamless updates for **500+** business users.
- Developed interactive **Power BI** dashboards visualizing key performance indicators for operational metrics, enabling stakeholders to make data-informed decisions and track system health with **99.9%** uptime.

SKILLS

Site Reliability Engineering – Incident Management, Production Support, SLA Management, Monitoring, Alerting, Automation, CI/CD.

Programming Languages – Python, Java, SQL.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn.

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker.

Databases – PostgreSQL, MySQL, Oracle.

Observability & CI/CD – Splunk, Dynatrace, Jenkins, Git.

Business Systems & BI – ERP Support, Power BI, DAX, Power Query, Data Modelling.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Mastercard Transaction Monitoring & Anomaly Detection Platform

- Architected and implemented a real-time transaction monitoring system using **Python** and **Java Spring Boot**, processing over **10 million** transactions daily with sub-second latency.
- Integrated **PostgreSQL** and **AWS Lambda** for scalable data ingestion and anomaly detection, reducing false positive alerts by **25%** through advanced pattern recognition algorithms.

- Developed comprehensive dashboards in **Power BI** to visualize transaction flows, identify bottlenecks, and provide operational insights, improving incident response times by **20%**.
- Established **CI/CD pipelines** with **Jenkins** and **Git** for automated deployment and testing, ensuring **99.95%** uptime for critical payment processing services.

Financial Services Operations Dashboard Enhancement

- Enhanced the production support capabilities of a financial-services payments operations dashboard by implementing advanced **Splunk**-based alerting for transaction failures, reducing critical alert response time by **30%**.
- Automated reconciliation workflow reporting using **Python** scripts and **SQL** queries against **Oracle** databases, decreasing manual effort by **50 hours** per month.
- Collaborated with business analysts to refine operational dashboards, ensuring adherence to **GDPR** requirements and audit trail integrity for financial transactions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
