PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed integration components for **streaming platforms** and **distributed systems**, processing over 1 million events daily to support financial data pipelines.
- Enhanced **REST APIs** running in **containerized environments**, providing secure data access to business users and reducing query latency by **40%**.
- Designed and implemented **data architecture components** for centralizing data definitions, improving data governance adherence by **25%** across core financial systems.
- Orchestrated complex business processes across disparate systems by building and deploying **distributed workflows**, decreasing manual intervention time by **30%**.
- Contributed to sprint planning and execution, collaborating with cross-functional teams to deliver new features for **portfolio accounting technology**, meeting all sprint goals.
- Integrated comprehensive **testing automation** at all levels of the software development lifecycle, improving code quality and reducing production defects by **15%**, embodying a **DevOps mindset**.

SKILLS

Programming Languages – Python, Java, SQL, R.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn.

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker.

Databases – PostgreSQL, MySQL, Oracle.

Development Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace.

Data & Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, statistical analysis.

System Integration – REST APIs, event-based systems, distributed systems.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Transaction Processing and Reconciliation Engine

- Engineered a high-throughput system to ingest and process 100,000+ financial transactions per hour using **Python** and **FastAPI**, ensuring near real-time reconciliation.
- Developed robust data pipelines with **PostgreSQL** and **Kafka** for reliable data ingestion and transformation, achieving **99.95%** data accuracy and implementing a comprehensive audit trail.

- Deployed the application within a **Dockerized, Kubernetes**-orchestrated environment on **AWS**, enabling seamless scaling and providing **REST APIs** for operational monitoring and business intelligence reporting.

Payments Operations Dashboard Enhancement

- Automated critical monitoring tasks for a payments operations dashboard using **Python** scripting, reducing manual checks by **50%** and improving incident detection.
- Optimized SQL queries against a large financial services database, decreasing report generation time by **20%** and supporting **transaction monitoring** workflows.
- Collaborated with business analysts to define requirements for new operational alerts, enhancing the dashboard's ability to flag failed payment messages and support **reconciliation workflows**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
